Zero worries. Your install is backed by the company with over 10,000 5-Star reviews!***

Visit njrhomeservices.com/summersavings

*Cooling and/or heating equipment must be purchased by May 31, 2024, and installed by June 14, 2024. Not valid on prior purchases. Offer subject to change without notice. Cannot be combined with any other coupon, promotion or discount. Terms and conditions apply.

**The HVAC financing program is brought to you by New Jersey Natural Gas Company (NJNG) and NJNG does not endorse any particular contractor. Financing only applies to HVAC upgrades. Offer applies only to customers on qualifying equipment. All offers of financing are subject to available funding. Maximum 0% APR financing is \$15,000. All loans are net of utility rebates. For example: On a \$15,000 repayment with an APR of 0% and a term of seven (7) years, the customer would make 83 payments of \$178.58 and one final payment of \$177.86. Terms and conditions apply. Visit savegreen.com for more information.

NJR Home Services is an independent contractor and not an employee or agent of New Jersey Natural Gas (NJNG). NJNG does not endorse or recommend any particular contractor. The contractor will perform work according to its own means and methods of work, and is not subject to the control or supervision of NJNG. If you have any questions, please contact NJNG at 877-455-NJNG (6564).

Generating Hope

Having a reliable power source is vital to keep essential services up and running for our neighbors. As part of our commitment to sustainable communities, we recently donated and installed generators at Ritesh Shah Charitable Pharmacy in Red Bank and Reformation Community Food Pantry in West Long Branch.

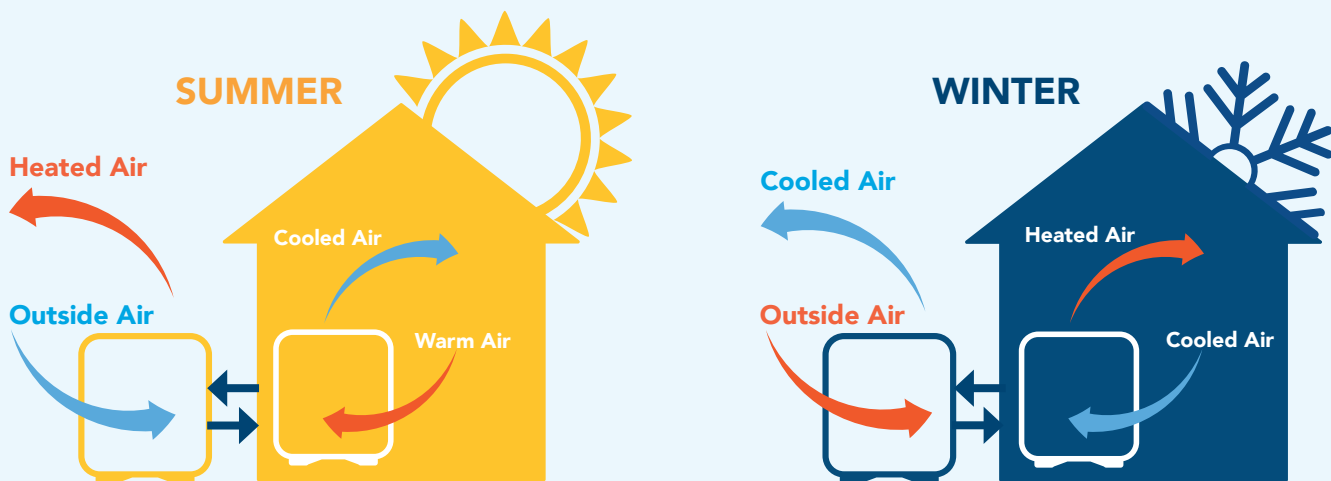

Through these and other outreach efforts, we can help our local businesses ensure the well-being of our community.

The Future of Sustainable Heating: Hybrid HVAC Systems

Hybrid HVAC Systems combine an electric heat pump and gas furnace that alternate based on seasonal temperatures, helping ensure year-round home comfort and optimal efficiency.

The electric heat pump efficiently cools your home during the summer and provides cost-effective heating during milder winter weather, while the furnace takes over during the colder temperatures to heat your home quickly and efficiently.
